Liana Bailey-Crimmins, Director
Jared Johnson, Chief Deputy Director

Dear California Broadband Council,

It is my pleasure to provide you with some advance materials for our third quarter California Broadband Council meeting, so you can fully engage and bring your unique perspective and organizational expertise to the ongoing conversation and effort to achieve Broadband for All in California.

Attached you will find the following:

1. Meeting Agenda
2. Master slide presentation deck

As you will see, there is a lot to cover.

CDT and the Office of Broadband and Digital Literacy continue to monitor and support the implementation of the Broadband for All Action Plan and have worked with long-term action item owners who will provide progress reports on their status.

As the new federal administration implements its policy priorities, we have seen shifts in guidance that affect key programs and terminated others that California collectively planned to leverage over the last few years. You will hear about some of the potential impacts of these policy changes and how we are planning and preparing to continue our digital equity work regardless of federal policy impacts.

Thank you for your continued partnership and commitment to closing the digital divide.

Liana Bailey-Crimmins,
Chair, California Broadband Council
State Chief Information Officer & Director, California Department of Technology
